Basic Concepts in Pharmacology: What You Need to Know for Each Drug Class, Fourth Edition By Janet Stringer

A time-saving, stress-reducing approach to learning the essential concepts of pharmacology

Great for USMLE review!

"This could be a very useful tool for students who struggle with understanding the most basic concepts in pharmacology for course and licensure examinations. 3 Stars."--*Doody's Review Service*

Basic Concepts in Pharmacology provides you with a complete framework for studying -- and understanding -- the fundamental principles of drug actions. With this unique learning system, you'll be able to identify must-know material, recognize your strengths and weaknesses, minimize memorization, streamline your study, and build your confidence. *Basic Concepts in Pharmacology* presents drugs by class, details exactly what you need to know about each class, and reinforces key concepts and definitions.

With this innovative text you'll be able to:

- Recognize the concepts you truly must know before moving on to other material
- Understand the fundamental principles of drug actions
- Organize and condense the drug information you must remember
- Review key information, which is presented in boxes, illustrations, and tables
- Identify the most important drugs in each drug class

Seven sections specifically designed to simplify the learning process and help you gain an understanding of the most important concepts:

- General Principles

- Drugs That Affect the Autonomic Nervous System
- Drugs That Affect the Cardiovascular System
- Drugs That Act on the Central Nervous System
- Chemotherapeutic Agents
- Drugs That Affect the Endocrine System
- Miscellaneous Drugs (Includes Toxicology and Poisoning)
