### **Editorial Review**

#### **Review**

##### **From the book reviews:**

“This is a review of hemodynamics in cardiovascular medicine. ... It is intended mainly for frontline cardiologists and critical care providers, including general cardiology fellows, interventional cardiology fellows, critical care fellows, general cardiologists and critical care intensivists. The board style-questions and clinical vignettes make the book useful as a supplemental source for board examination preparation. ... It is an excellent book that I highly recommend for anyone interested in learning more about hemodynamics.” (Mohi Alkadri, Doody’s Book Reviews, April, 2013)
