Operations Management By Peter Jones, Peter Robinson

Operations Management is an innovative media and text package that clearly demonstrates the relevance of operations to everyday business activities. Introducing all of the core topics in a lively and engaging manner, authors Peter Jones and Peter Robinson make the material relevant and meaningful to students, including those with no background in the subject. They first introduce the unique structure of operations management before moving on to operations design and strategy, thereby mirroring what graduates will encounter in their future careers.

The text is supplemented by a unique integrated media package available on the companion website--running video case material, animated diagrams, and voiced-over quantitative models linked via QR codes in the text--that shows students how core operations theory is applied to real-world situations.

Packed full of case material and examples from companies that students can easily relate to--such as Domino's, EasyJet, and Ticketmaster--*Operations Management* challenges students to think about actual business issues and what they might encounter in their future careers. Real-life problems are used to carefully explain quantitative data, and links to seminal papers throughout each chapter support and strengthen the theories discussed.

The Companion Website (coming soon!) contains resources for both students and instructors:

For Students:

- * Animated diagrams from the book, accompanied by audio that helps to explain concepts
- * An annotated library of links to footage of "Operations in Action"
- * Web-based activities
- * Multiple-choice questions
- * Seminal paper links
- * Downloadable flashcard glossary

For Instructors:

- * Customized video case material (interviews and processes tied to each chapter). Broken down into five-minute clips, these can either be shown in relation to a chapter topic or as a whole film demonstrating how one company utilizes many aspects of OM.
- * Customizable PowerPoint-based slides
- * Tutor guide
- * Tutorial activities
- * Answers to discussion questions
- * Test bank

Editorial Review

Review

"A replacement text that performs the task of introduction better than the ones in use at the moment."

--Simon Snowden, University of Liverpool

"I think this text is taking an innovative approach to teaching operations management. In particular the ordering of the material is new and makes a lot of sense, particularly with the age profile and experience of students taking this module."

--Dr PJ Byrne, Dublin City University

"I find that the case studies appearing in each chapter are certainly one of the strengths of this book, as they are timely, relevant and engaging."

--Dr Tolga Bektas, University of Southampton

About the Author

Prof. Peter Jones heads up the Hospitality and Food Management Group at the University of Surrey, where for ten years he was the ITCA Chair of Production and Operations Management. He is the author, co-author or editor of twelve textbooks, many of which are in the field of operations management. He also serves as Associate Editor on a number of editorial boards, where he is responsible for publishing journal articles with an operations focus. His own published research articles have been on a wide range of OM topics - such as mass customisation, statistical process control, revenue management, and productivity. He also writes a regular column for an industry magazine - Onboard Hospitality - as well as blogging and tweeting on operations management issues. As a consultant he has advised major European companies, and has devised and run service management development workshops for them. He has a MBA from London Business School and a PhD from the University of Surrey. Peter Robinson is a Tutor in Operations Management at the University of Surrey, School of Business. Since 2006 he has taught Operations Management and Project Management at Undergraduate level and Operations Strategies at MSc and MBA levels. Prior to that he worked for 10 years as a Board member for an international automotive supply company and has additional experience in implementing new technology into both manufacturing and administrative sections of a number of businesses.

Users Review

From reader reviews:

Milton Hill:

People live in this new time of lifestyle always make an effort to and must have the time or they will get large amount of stress from both everyday life and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not only a robot. Then we request again, what kind of activity are there when the spare time coming to you of course your answer may unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, the particular book you have read is Operations Management.

Carmen Russell:

Playing with family inside a park, coming to see the water world or hanging out with buddies is thing that usually you might have done when you have spare time, subsequently why you don't try issue that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Operations Management, you may enjoy both. It is fine combination right, you still want to miss it? What kind of hangout type is it? Oh can occur its mind hangout people. What? Still don't have it, oh come on its called reading friends.

Robert Knight:

This Operations Management is great book for you because the content which can be full of information for you who else always deal with world and have to make decision every minute. This particular book reveal it data accurately using great manage word or we can point out no rambling sentences within it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but tough core information with wonderful delivering sentences. Having Operations Management in your hand like obtaining the world in your arm, info in it is not ridiculous just one. We can say that no guide that offer you world within ten or fifteen minute right but this guide already do that. So , this is certainly good reading book. Hi Mr. and Mrs. active do you still doubt this?

Terry Buehler:

Is it anyone who having spare time after that spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something totally new? This Operations Management can be the response, oh how comes? It's a book you know. You are consequently out of date, spending your time by reading in this new era is common not a geek activity. So what these textbooks have than the others?
