Editorial Review

About the Author

Eric J. Simon is an associate professor of Department of Biology and Health Science at New England College in Henniker, New Hampshire. He teaches introductory biology to science majors and nonscience majors, as well as upper-level courses in genetics, microbiology, tropical marine biology, and molecular biology. Dr. Simon received a B.A. in biology and computer science and an M.A. in biology from Wesleyan University and a Ph.D. in biochemistry from Harvard University. His research focuses on innovative ways to use technology to improve teaching and learning in the science classroom, particularly for nonscience majors. He is the coauthor of *Campbell Biology: Concepts and Connections*, Seventh Edition.

Jane B. Reece has worked in biology publishing since 1978, when she joined the editorial staff of Benjamin Cummings. Her education includes an A.B. in biology from Harvard University (where she was initially a philosophy major), an M.S. in microbiology from Rutgers University, and a Ph.D. in bacteriology from the University of California, Berkeley. At UC Berkeley and later as a postdoctoral fellow in genetics at Stanford University, her research focused on genetic recombination in bacteria. Dr. Reece taught biology at Middlesex County College (New Jersey) and Queensborough Community College (New York). During her twelve years as an editor, she played a major role in a number of successful textbooks. She is the lead author of *Campbell Biology*, Ninth Edition and *Campbell Biology: Concepts & Connections*, Seventh Edition.

Jean L. Dickey is a professor of biology at Clemson University. She had no idea that science was interesting until her senior year in high school, when a scheduling problem landed her in advanced biology. Abandoning plans to study English or foreign languages, she enrolled in Kent State University as a biology major. After receiving her B.S. in biology, she went on to earn a Ph.D. in ecology and evolution from Purdue University. Since joining the faculty at Clemson in 1984, Dr. Dickey has specialized in teaching nonscience majors, including a course designed for pre-service elementary teachers and workshops for in-service teachers. She also developed an investigative laboratory curriculum for general biology. Dr. Dickey is the author of *Laboratory Investigations for Biology*, Second Edition, and is a coauthor of *Campbell Biology: Concepts & Connections*, Seventh Edition.

Users Review

From reader reviews:

Rodney Richardson:

Here thing why this particular Campbell Essential Biology with Physiology (4th Edition) are different and trusted to be yours. First of all studying a book is good nonetheless it depends in the content of computer which is the content is as delightful as food or not. Campbell Essential Biology with Physiology (4th Edition) giving you information deeper since different ways, you can find any publication out there but there is no publication that similar with Campbell Essential Biology with Physiology (4th Edition). It gives you thrill examining journey, its open up your personal eyes about the thing in which happened in the world which is probably can be happened around you. It is easy to bring everywhere like in park, café, or even in your way home by train. When you are having difficulties in bringing the printed book maybe the form of Campbell Essential Biology with Physiology (4th Edition) in e-book can be your choice.

Clarence Danner:

Reading a book to be new life style in this year; every people loves to learn a book. When you read a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, in addition to soon. The Campbell Essential Biology with Physiology (4th Edition) will give you a new experience in reading through a book.

Rachel Cady:

In this age globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you is Campbell Essential Biology with Physiology (4th Edition) this reserve consist a lot of the information from the condition of this world now. This book was represented how can the world has grown up. The language styles that writer use to explain it is easy to understand. Often the writer made some research when he makes this book. Honestly, that is why this book suitable all of you.

Roger Richmond:

What is your hobby? Have you heard in which question when you got learners? We believe that that problem was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you know that little person similar to reading or as looking at become their hobby. You must know that reading is very important along with book as to be the point. Book is important thing to provide you knowledge, except your own teacher or lecturer. You find good news or update in relation to something by book. Many kinds of books that can you go onto be your object. One of them are these claims Campbell Essential Biology with Physiology (4th Edition).
