### Editorial Review

#### Review

“Having observed his market calls real time over the years, I can say that Jason Perl’s application of the DeMark indicators distinguishes his work from industry peers when it comes to market timing. This book demonstrates how traders can benefit from his insight, using the studies to identify the exhaustion of established trends or the onset of new ones. Whether you’re fundamentally or technically inclined, Perl’s *DeMark Indicators* is an invaluable trading resource.”--Leon G. Cooperman, chairman, Omega Advisors

“Tom DeMark, the man whose work inspired this book, is a unique, interesting, and oftentimes iconoclastic technical analyst. Simply put, he thinks about the markets differently from the way you or I do. So why should you read this book? Because, having read it, you will almost certainly think about the markets and technical analysis differently.”--John Bollinger, CFA, CMT, [www.BollingerBands.com](http://www.BollingerBands.com)

“Jason Perl has taken the playbook from the market’s John Wooden, Tom DeMark, and translated it engagingly in a format that traders of all levels will appreciate. As one who has used these indicators for more than twenty years, I too am appreciative of Jason’s clarity.”--Peter Borish, Chairman and CEO, Computer Trading Corporation

From the Inside Flap

The Bloomberg Market Essentials™: Technical Analysis Series profiles the most popular tools and explains how to use them effectively.

The DeMark indicators are sophisticated standalone market-timing tools, but they can also be used with more traditional technical studies such as:

- Moving averages
- Momentum oscillators
- Trendlines
- Fibonacci retracements
- Elliott wave

Differentiating between trading ranges and trend exhaustion is a problem that has long plagued traders in every market sector. In a sea of pre-dominantly trend-following technical studies, one set of contrarian market-timing indicators stands out from the rest, precisely because it is predictive: DeMark indicators were designed specifically to anticipate trend reversals. Their creator, Tom DeMark, has served as consultant to such revered money managers as George Soros, Paul Tudor Jones, and Steven A. Cohen.
