## **Regulated Bioanalytical Laboratories: Technical and Regulatory Aspects from Global Perspectives** By Michael Zhou

This book provides useful information for bioanalytical / analytical scientists, analysts, quality assurance managers, and all personnel in bioanalytical laboratories through all aspects of bioanalytical technical and regulatory perspectives within bioanalytical operations and processes. Readers learn how to develop and implement strategies for routine, non-routine, and standard bioanalytical methods and on the entire equipment hardware and software qualification process. The book also gives guidelines on qualification of certified standards and in-house reference material as well as on people qualification. Finally, it guides readers through stressless internal and third party laboratory audits and inspections. It takes account to most national and international regulations and quality and accreditation standards, along with corresponding interpretation and inspection guides. The author elaborates on highly comprehensive content, making it easy not only to learn the subject but also to quickly implement the recommendations.

## **Editorial Review**

### **Review**

#### **From the Back Cover**

Everything staff members in bioanalytical/analytical laboratories and quality assurance unit need to know about technical expertise and regulatory compliance

This book provides much-needed practical information on how to generate and review data for regulatory consideration in the biotech, pharmaceutical, and life science industries. It explains in detail how to develop and implement effective strategies for meeting technical challenges, Good Laboratory Practice (GLP) and GxP requirements from global perspectives, with an emphasis on tools and techniques for ensuring the quality and integrity of study data.

Readers will gain invaluable insight into the entire hardware and software qualification process as well as people qualification, learn how to get through laboratory audits and inspections with ease, and acquire a thorough understanding of all regulatory issues relevant to their work. Coverage includes:

- International standards and regulations from the US FDA, USP, ICH, OECD, WHO, ISO, EMEA, and EU
- Requirements, objectives, and implementation of GLP and GxP quality systems
- Facility and personnel infrastructure and qualification
- Techniques for modern bioanalytical / analytical sample preparation and essential concepts in extraction chemistry and separation mechanisms
- Specific strategies for the efficient use of laboratory automation with high throughput
- Instrumental analysis for hyphenated techniques such as LC-MS/MS and so on
- Important laboratory applications of Ligand Binding Assays (LBAs) and biomarker assays

A must-have for scientists, graduate students, and quality assurance managers in bioanalytical laboratories, *Regulated Bioanalytical Laboratories* is also an essential reference for anyone interested in the overall technical know-how, regulatory, and quality assurance trends in the field.

### **About the Author**

Michael Zhou, PhD, is Director of Bioanalytical Chemistry at Synta Pharmaceuticals Corporation and a highly regarded expert on analytical/bioanalytical operations, regulatory compliance, including Good Laboratory Practice (GLP), cGMP, GCP regulations, and ICH, GCLP, BMV guidelines. Dr. Zhou has given numerous presentations and workshops / short courses on the topics at national and international conferences and has authored over fifty research articles and two book chapters on analytical/bioanalytical chemistry

## **Users Review**

### **From reader reviews:**

**Rebecca Burks:**

Now a day folks who Living in the era everywhere everything reachable by connect to the internet and the resources in it can be true or not need people to be aware of each details they get. How individuals to be smart in obtaining any information nowadays? Of course the solution is reading a book. Looking at a book can help men and women out of this uncertainty Information specifically this Regulated Bioanalytical Laboratories: Technical and Regulatory Aspects from Global Perspectives book because this book offers you rich details and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it everbody knows.

**Joseph Taylor:**

The publication with title Regulated Bioanalytical Laboratories: Technical and Regulatory Aspects from Global Perspectives has lot of information that you can find out it. You can get a lot of gain after read this book. This specific book exist new expertise the information that exist in this e-book represented the condition of the world now. That is important to yo7u to be aware of how the improvement of the world. This particular book will bring you within new era of the globalization. You can read the e-book on your smart phone, so you can read that anywhere you want.

**Julio Yates:**

With this era which is the greater man or woman or who has ability to do something more are more special than other. Do you want to become one of it? It is just simple method to have that. What you are related is just spending your time almost no but quite enough to possess a look at some books. One of several books in the top record in your reading list will be Regulated Bioanalytical Laboratories: Technical and Regulatory Aspects from Global Perspectives. This book and that is qualified as The Hungry Slopes can get you closer in getting precious person. By looking up and review this reserve you can get many advantages.

**Terry Brown:**

You will get this Regulated Bioanalytical Laboratories: Technical and Regulatory Aspects from Global Perspectives by visit the bookstore or Mall. Simply viewing or reviewing it could to be your solve difficulty if you get difficulties to your knowledge. Kinds of this publication are various. Not only simply by written or printed but also can you enjoy this book through e-book. In the modern era such as now, you just looking of your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose right ways for you.
