Editorial Review

Review

'The editors and authors meet their ambition of providing an overview of surveillance politics and practices in Europe, assessing and evaluating the societal impact and raising awareness of the drawbacks of mass surveillance... This book deserves the attention of the wider public since it is the first attempt to interconnect issues of surveillance and resilience... The editors and the authors appeal to European societal stakeholders, including citizens, to not slavishly accept the characteristics and consequences of the surveillance society, but instead to show resistance in order to become protected against the arbitrariness and exploitation of surveillance practices. This is an important book.'? Kees Boersma, VU University Amsterdam, Criminal Law and Criminal Justice Books (Rutgers University)
