Priorities in Critical Care Nursing, 6e (Urden, Priorities in Critical Care Nursing) By Linda D. Urden DNSc RN CNS NE-BC FAAN, Kathleen M. Stacy PhD RN CNS CCRN PCCN CCNS, Mary E. Lough PhD RN CCRN CNRN CCNS FCCM

Priorities in Critical Care Nursing, 6th Edition is the perfect companion to any critical care course with its succinct coverage of all core critical care nursing topics. Using the latest, most authoritative research, this evidence-based resource helps you identify priorities to accurately and effectively manage patient care. Updated content spans the areas of medication, patient safety, patient education, nursing diagnosis, and collaborative management to fully prepare you for success in all aspects of critical care nursing.

- **Evidence-based approach** offers the most accurate and timely patient care recommendations based on the latest and most authoritative research, meta-analyses, and systematic reviews available.
- **Patient Safety Priorities boxes** in each therapeutic management chapter highlight important patient safety considerations.
- **UNIQUE! Nursing Diagnosis Priorities boxes** list the most urgent potential nursing diagnoses, with a page reference to the corresponding Nursing Management Plan.
- **Nursing Management Plans** provide you with a complete care plan for every Priority Diagnosis that includes the diagnosis, definition, defining characteristics, outcome criteria, nursing interventions, and rationales.
- **Evidence-Based Collaborative Practice boxes** summarize evidence-based recommendations for a variety of therapies.
- **Collaborative Management boxes** guide you through the management of a wide variety of disorders.
- **Patient Education boxes** list the concepts that must be taught to the patient and the family before discharge from the ICU.
- **Concept maps** help you understand common critical health conditions, including acute coronary syndrome, acute renal failure, ischemic stroke, and shock.

- **NEW! Case studies with critical thinking questions** test your understanding of key concepts and their practical applications.
- **NEW! Priority Medication boxes** give you a foundation in the pharmacology used most in critical care.
- **UPDATED! New information on the management of the alcoholic patient** and disorders resulting from alcoholism is added to chapter nine.

Editorial Review

Review

"This text covers theory, practical skills and knowledge of critical care nursing. It is written by experts in the field of critical care nursing and the content has also been reviewed by academic and clinical experts. There are nine units, which cover foundations in critical care nursing and its common problems as well as the major body system alterations of the critical care patient. These units are evidence based and appropriately referenced. Also included are two appendices, with one being nursing management plans of care and the other physiological formulas for critical care that are a useful reference aid. There is an index for ease of finding topics of interest. The text is reader friendly, presented in a logical manner and accessible with illustrations and tables... This book would be useful for nurses and other allied health professionals who are new to the critical care environment or student nurse on placement in a critical care environment."

Nursing Times, January 2013

Users Review

From reader reviews:

Cindy Moats:

The particular book Priorities in Critical Care Nursing, 6e (Urden, Priorities in Critical Care Nursing) has a lot details on it. So when you read this book you can get a lot of gain. The book was published by the very famous author. The author makes some research previous to write this book. This kind of book very easy to read you can obtain the point easily after perusing this book.

Hazel Reinoso:

Reading can called imagination hangout, why? Because when you find yourself reading a book especially book entitled Priorities in Critical Care Nursing, 6e (Urden, Priorities in Critical Care Nursing) your thoughts will drift away through every dimension, wandering in every aspect that maybe unknown for but surely can become your mind friends.
