Social Dynamics By Brian Skyrms

Brian Skyrms presents eighteen essays which apply adaptive dynamics (of cultural evolution and individual learning) to social theory. Altruism, spite, fairness, trust, division of labor, and signaling are treated from this perspective. Correlation is seen to be of fundamental importance. Interactions with neighbors in space, on static networks, and on co-evolving dynamics networks are investigated. Spontaneous emergence of social structure and of signaling systems are examined in the context of learning dynamics.

Editorial Review

Review

"*Social Dynamics* offers a careful, informed exploration of the relevant ones, as well as discussions of their explanatory import. No one interested in the evolution of sociality should ignore it, if only to know what it takes to carry out a thorough evolutionary investigation."
