Gallium Nitride Electronics (Springer Series in Materials Science) By Rüdiger Quay

This book is based on nearly a decade of materials and electronics research at the leading research institution on the nitride topic in Europe. It is a comprehensive monograph and tutorial that will be of interest to graduate students of electrical engineering, communication engineering, and physics; to materials, device, and circuit engineers in research and industry; to all scientists with a general interest in advanced electronics.

Editorial Review

From the Back Cover

Gallium Nitride Electronics covers developments in III-N semiconductor-based electronics with a focus on high-power and high-speed RF applications. Material properties of III-N semiconductors and substrates; the state-of-the-art of devices and circuits, epitaxial growth, device technology, modelling and characterization; and circuit examples are discussed. The book concludes with device reliability aspects and an overview of integration and packaging. This comprehensive monograph and tutorial is based on more than a decade of research on materials, devices, and circuits. It is of interest to graduate students of electrical engineering, communication engineering, and physics; to materials, device, and circuit engineers in research and industry; and to all scientists with a general interest in advanced electronics.

About the Author

Rüdiger Quay was born in Köln, Germany, in 1971. He studied physics and economics at the University of Bonn and the RWTH Aachen, where he received his "Diplom" in physics in 1997. In summer 1996 he held a visiting research position at Los Alamos National Laboratory, New Mexico, USA, for his master's thesis. In 1999, he was a visiting researcher at the Beckman Institute, University of Illinois, Urbana Champaign. In 2001 he received the doctoral degree in technical sciences with honors from the Technische Universität Wien, Austria. He has published more than 30 refereed publications and he is one of the authors of the book "Analysis and Simulation of Heterostructure Devices". His scientific interests include RF-semiconductor device and process development, heterostructure device modeling and simulation, and circuit and reliability issues. Rüdiger Quay currently is a research engineer at Fraunhofer Institute for Applied Solid-State Physics (IAF) in Freiburg, Germany, involved in the development and large-signal characterization of high-power and high-speed AlGaIn/GaN amplifiers and the development of high-speed InP HBTs for high data rate communication at 80~Gbit/s and beyond.

Users Review

From reader reviews:

Elizabeth Parker:

In other case, little men and women like to read book Gallium Nitride Electronics (Springer Series in Materials Science). You can choose the best book if you like reading a book. As long as we know about how is important some sort of book Gallium Nitride Electronics (Springer Series in Materials Science). You can add expertise and of course you can around the world by a book. Absolutely right, due to the fact from book you can understand everything! From your country right up until foreign or abroad you will be known. About simple point until wonderful thing you could know that. In this era, you can open a book or even searching by internet system. It is called e-book. You can utilize it when you feel bored to go to the library. Let's study.

Brenda Nunez:

Book is to be different for every grade. Book for children right up until adult are different content. To be sure that book is very important usually. The book Gallium Nitride Electronics (Springer Series in Materials Science) ended up being making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The publication Gallium Nitride Electronics (Springer Series in Materials Science) is not only giving you considerably more new information but also being your friend when you sense bored. You can spend your own personal spend time to read your reserve. Try to make relationship with the book Gallium Nitride Electronics (Springer Series in Materials Science). You never truly feel lose out for everything should you read some books.

Lena Robertson:

Information is provisions for folks to get better life, information these days can get by anyone with everywhere. The information can be a expertise or any news even a concern. What people must be consider if those information which is from the former life are challenging to be find than now could be taking seriously which one would work to believe or which one often the resource are convinced. If you have the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Gallium Nitride Electronics (Springer Series in Materials Science) as the daily resource information.

Mary Adams:

The book untitled Gallium Nitride Electronics (Springer Series in Materials Science) contain a lot of information on that. The writer explains your girlfriend idea with easy approach. The language is very clear to see all the people, so do definitely not worry, you can easy to read the idea. The book was compiled by famous author. The author will bring you in the new period of literary works. It is easy to read this book because you can continue reading your smart phone, or gadget, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site and also order it. Have a nice go through.
