Editorial Review

From School Library Journal

Grade 5-8. Meg Lowman is a scientist who has spent years studying the rain forest canopy. Lasky and Knight join her in the treetops of Belize to record the wonders of plant and animal life found more than 100 feet above the ground. Yet, this book is not simply another chronicle of rain forest ecology, although the exceptional full-color photographs document with clarity the teeming life to be found there. Lasky also explains the methods scientists use to conduct research in this environment, sometimes under extremely difficult circumstances. For example, to gather leaf samples in Cameroon, Lowman had to hang over the edge of an inflatable raft suspended beneath a dirigible. In Belize, she uses walkways high above ground and, for the first time, allows her young sons to join her in the canopy. The long hours the scientist devotes to her work are not minimized, but her love for her research is evident. Her story might encourage young women considering science careers. Lowman's reading to her sons at bedtime from *Treasure Island* and her private ruminations about Harriet Tubman seem a bit forced and extraneous, but they shouldn't discourage anyone from purchasing this unusual and effective book. —Kathy Piehl, Mankato State University, MN

Gr. 3⁺-5. Lasky's unusually vivid introduction to the rainforest follows biologist Meg Lowman into the canopy to look at plants and animals. The director of research and conservation at a center in Florida, Lowman travels with her two young sons to a rain forest site in Belize. There she and her assistant climb into the canopy and perform their experiments. They inspect leaves eaten by insects, look at "ant gardens" in the treetops, and observe the activities of various insects and animals and their effects on plant life. Later, the scientist takes her sons on their first trip to the canopy and then for an evening nature walk on the forest floor. The narrative approach to nature study can be tedious, but Lasky's writing creates scenes and relates facts in ways that are vivid and memorable. Every page of this large-format book features colorful photographs that reflect the you-are-there quality of the text: long-range views of the forest, close-ups of individual species, and many pictures of Lowman and her sons, which have a natural, unstudied look. Fresh in outlook and intriguing in details, this book will strengthen any library collection on the rainforest. *Carolyn Phelan*

Review

Meg Lowman has one of the world's most exciting jobs. She is a scientist who studies the rainforest canopy. The day she takes her son to work they strap on equipment and join her in the treetops. The writer's angle is unique and the photographs are spectacular. APPROVED -- *From Parents' Choice*®

From reader reviews:

Barbara Marburger:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite e-book and reading a reserve. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled *The Most Beautiful Roof in the World: Exploring the Rainforest Canopy*. Try to face the book *The Most Beautiful Roof in the World: Exploring the Rainforest*

Canopy as your buddy. It means that it can to get your friend when you truly feel alone and beside associated with course make you smarter than previously. Yeah, it is very fortunate for you personally. The book makes you much more confidence because you can know every little thing by the book. So , we should make new experience as well as knowledge with this book.

Harold Walsh:

People live in this new time of lifestyle always aim to and must have the extra time or they will get great deal of stress from both everyday life and work. So , if we ask do people have free time, we will say absolutely indeed. People is human not really a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will probably unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, often the book you have read will be The Most Beautiful Roof in the World: Exploring the Rainforest Canopy.

Valerie Little:

Your reading sixth sense will not betray an individual, why because this The Most Beautiful Roof in the World: Exploring the Rainforest Canopy book written by well-known writer who knows well how to make book which might be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and composing skill only for eliminate your hunger then you still uncertainty The Most Beautiful Roof in the World: Exploring the Rainforest Canopy as good book not merely by the cover but also with the content. This is one book that can break don't assess book by its include, so do you still needing another sixth sense to pick this!? Oh come on your examining sixth sense already said so why you have to listening to another sixth sense.

Pamela Eckert:

As we know that book is important thing to add our expertise for everything. By a publication we can know everything we want. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book The Most Beautiful Roof in the World: Exploring the Rainforest Canopy was filled in relation to science. Spend your time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading any book. If you know how big benefit of a book, you can sense enjoy to read a e-book. In the modern era like currently, many ways to get book which you wanted.
