Land Administration (Spatial Information Systems) By Peter F. Dale, John D. McLaughlin

This interdisciplinary work provides a high level overview of recent advances in building formal property systems throughout the world and reviews the role of property in advancing a society's economic and social agenda. It undertakes an in-depth examination of the land administration infrastructure required to support these modern property systems, giving particular attention to survey, registration, valuation, and land use control functions.

Editorial Review

Review

'The book is a concise introduction to the field of land administration with the focus placed on policies and not techniques. It is directed towards a readership consisting of managers and administrators and should be of special interest to an audience in the developing countries.' Quarterly Journal of International Agriculture 40, no.3

About the Author

Peter Dale is Professor of Land Information Management, University College London

John McLaughlin is Vice president (Research and International Co-operation) at the University of New Brunswick.

Users Review

From reader reviews:

Thelma Brady:

Book will be written, printed, or highlighted for everything. You can recognize everything you want by a publication. Book has a different type.
