Clinical Textbook of Addictive Disorders, Third Edition From Brand: The Guilford Press

This authoritative work comprehensively examines all aspects of addictive disorders and their treatment. Leading researchers and practitioners identify best practices in assessment and diagnosis and provide tools for working with users of specific substances. Issues in working with particular populations--including polysubstance abusers, culturally diverse patients, women, and older adults--are addressed, and widely used psychosocial and pharmacological treatment approaches are reviewed. An indispensable text for anyone studying or treating these prevalent, challenging disorders, the book describes ways to tailor interventions to each patient's needs while delivering compassionate, evidence-based care.

Editorial Review

Review

"Carefully selected experts within their respective domains have put together an astonishingly comprehensive reference work, well edited and accessible....This work has truly become a classic in the field!"--Leo Goldberger, PhD, Department of Psychology (Emeritus), New York University

"*Clinical Textbook of Addictive Disorders, Third Edition*, nicely depicts the many recent advances that have taken place in the addictions field. The latest neuroscientific knowledge--including neurobiological mechanisms, pathophysiology, and genetics--is well presented, as are current evidence-based intervention methods. The authors assembled here represent the top experts in their respective areas. This new edition is an ideal tool for all mental health practitioners and trainees involved in diagnosing and treating persons with addictive disorders, as well as for researchers and educators."--Pedro Ruiz, MD, Department of Psychiatry and Behavioral Sciences, University of Texas Medical School at Houston

"This is more than just an update of the classic reference. In this edition, addictive disorders have been placed in a context reflecting their expression in the real world. Thus, polydrug use, psychiatric comorbidity, and 'behavioral addictions,' such as pathological gambling, are now emphasized. Moreover, issues related to addiction across populations (e.g., ethnic groups, gender, and children/adolescents) are now addressed. The result is a volume that will be useful for professionals in social services, health care, and public policy, as well as advanced students training for these professions."--Thomas H. Brandon, PhD, Department of Psychology, University of South Florida, and Tobacco Research and Intervention Program, H. Lee Moffitt Cancer Center and Research Institute

"I have been looking forward to the new edition of this useful teaching tool. Beyond covering the basics that readers expect from an addiction text--pharmacology of specific substances and major treatment modalities--the editors also address a breadth of other topics, including polydrug use, comorbidities, HIV/AIDS, and the needs of women and older adults. The comprehensiveness and readability of this text promise to make it a favorite among clinical educators, medical students, and residents."--Joyce A. Tinsley, MD, Department of Psychiatry, University of Connecticut; Executive Director, American Association of Directors of Psychiatric Residency Training

"An essential clinical resource, this revised and updated volume features comprehensive yet focused coverage of the most important and innovative topics in the ever-changing field of substance abuse treatment. Written by noted practitioners and researchers, chapters range from the pharmacology of psychoactive drugs to the latest psychosocial interventions and medications shown to be effective in treating patients with alcohol and drug problems. This is an ideal text for providing students with a broad overview of the field as well as specific guidelines for clinical practice. Practitioners will find it a handy reference for state-of-the-art conceptualizations and treatments for the full range of substance use disorders."--Arnold M. Washton, PhD, private practice, New York, New York, and Princeton, New Jersey

"Excellent....The authors provide us with a textbook that is quick to read and easy to digest. I have found over the years that residents enjoy this book and can learn from it readily....The clinician will find this

textbook useful and handy in a busy practice. As a certified addictions specialist, I have found it useful in my day-to-day practice. I highly recommend this book and will certainly keep a copy of it on my shelf."
(*American Journal of Psychiatry* 1999-08-03)

"This is an important, accessible, comprehensive book; I commend the authors and editors for their work....This is a useful text for teaching about the addictive disorders in many fields, including medicine, psychology, social work, counseling, and nursing....Stands out as a readable and authoritative text....This text deserves to be read by mental and behavioral health care professionals before it takes its useful and deserved place on their reference bookshelves."

(*PsycCRITIQUES* 2011-01-07)

"For those who are preparing for their board examinations in addiction psychiatry, this textbook may serve as a study guide and starting point for a more detailed review. For general psychiatrists, the text includes sufficient detail to help them through most clinical situations they may face in daily practice."

(*Journal of Clinical Psychiatry* 1999-12-03)

"A magnificent book. I would particularly wish to point readers in the direction of Part IV, Special populations. This is probably the most comprehensive review of this area that I have seen in a comprehensive textbook available at this price....Should you read this book? Undoubtedly, the answer has to be a resounding yes....It would be very difficult for someone to not find chapters that interest them but in some ways what is excellent about this book is those subjects that do not routinely cross your path in clinical practice."

(*Drugs and Alcohol Today* 2011-01-07)

"As a student in the mental-health field, this book has already been helpful in my studies....A valuable resource to anyone who works or is thinking about working in the addiction-treatment field."

(*Addiction Today* 2011-01-07)

About the Author

Richard J. Frances, MD, is Clinical Professor of Psychiatry, New York University School of Medicine, and Director of Public and Professional Education, Silver Hill Hospital, New Canaan, Connecticut. He is also in private practice in New York City. Dr. Frances was former President and Medical Director at Silver Hill Hospital; was founding president of the American Academy of Addiction Psychiatry; and helped found and chaired the Council of Addiction Psychiatry for the American Psychiatric Association. The author of several hundred articles and several books, he is on many editorial boards. He is a frequent lecturer on addiction psychiatry and has appeared numerous times on *Court TV*.
