### The Age of Unreason By Charles Handy

In an era when change is constant, random, and, as Handy calls it, discontinuous, it is necessary to break out of old ways of thinking in order to use change to our advantage. Handy examines how dramatic changes are transforming business, education, and the nature of work. We can see it in astounding new developments in technology, in the shift in demand from manual to cerebral skills, and in the virtual disappearance of lifelong, full-time jobs. Handy maintains that discontinuous change requires discontinuous, upside-down thinking, and discusses the need for new kinds of organizations, new approaches to work, new types of schools, and new ideas about the nature of our society.

### Editorial Review

#### From Library Journal

Handy, a British specialist in organizational management, predicts that the 21st century will be the Age of Unreason. In an era when changes in business and society will be "discontinuous" or patternless, he suggests that our thinking must become discontinuous or "unreasonable" in order to use such changes to our advantage. While his thesis is generally in line with strategists like Tom Peters ( *In Search of Excellence*, LJ 2/15/83), Handy focuses more on the philosophy, rather than the mechanics, of adaptive change in society. His examples from the business world are interestingly extended to social institutions like marriage and family. Nicely written, this should be popular with open-minded management types. A good addition to management collections.
