The Physics and Technology of Ion Sources From Wiley-VCH

The first edition of this title has become a well-known reference book on ion sources. The field is evolving constantly and rapidly, calling for a new, up-to-date version of the book. In the second edition of this significant title, editor Ian Brown, himself an authority in the field, compiles yet again articles written by renowned experts covering various aspects of ion source physics and technology. The book contains full chapters on the plasma physics of ion sources, ion beam formation, beam transport, computer modeling, and treats many different specific kinds of ion sources in sufficient detail to serve as a valuable reference text.

Editorial Review

From the Publisher

New applications call for ion beams of unprecedented energy, current, species, focus, uniformity, size, and charge states. This comprehensive, up-to-date review of the rapidly evolving field of ion source technology relates improvements to traditional ion sources and describes development of new kinds of ion sources. Physical principles, as well as their technical implementation, are covered. Chapters are self-contained, making for easy reference.

From the Back Cover

The first edition of this title has become a well-known reference book on ion sources. The field is evolving constantly and rapidly, calling for a new, up-to-date version of the book. In the second edition of this significant title, editor Ian Brown, himself an authority in the field, compiles yet again articles written by renowned experts covering various aspects of ion source physics and technology. The book contains full chapters on the plasma physics of ion sources, ion beam formation, beam transport, computer modeling, and treats many different specific kinds of ion sources in sufficient detail to serve as a valuable reference text.

About the Author

Ian Brown is a Senior Physicist at the Lawrence Berkeley national Laboratory, Berkeley, California. His research interests include the development of plasma and ion sources and their application for materials synthesis and modification. In 1984 he established the Plasma Applications Group at the Berkeley Laboratory and was Group Leader there until his retirement in 2001. He maintains an interest in ongoing research and is actively involved in a number of collaborative research programs; his work on vacuum arc ion sources and materials surface modification has won several awards.

Users Review

From reader reviews:

Jamie Arellano:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to be aware of everything in the world. Each guide has different aim or goal; it means that guide has different type. Some people truly feel enjoy to spend their time and energy to read a book. They may be reading whatever they take because their hobby is actually reading a book. Why not the person who don't like reading through a book? Sometime, man or woman feel need book whenever they found difficult problem as well as exercise. Well, probably you will want this The Physics and Technology of Ion Sources.

Harold Walsh:

Exactly why? Because this The Physics and Technology of Ion Sources is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will shock you with the secret the idea inside. Reading this book close to it was fantastic author who write the book in such awesome way makes the content on the inside easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of advantages than the other book have such as help improving your skill and your critical thinking

approach. So , still want to hesitate having that book? If I had been you I will go to the e-book store hurriedly.

Tom Tucker:

Playing with family within a park, coming to see the coastal world or hanging out with buddies is thing that usually you will have done when you have spare time, subsequently why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love The Physics and Technology of Ion Sources, it is possible to enjoy both. It is good combination right, you still need to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its called reading friends.

Hoyt Adkins:

That reserve can make you to feel relax. This kind of book The Physics and Technology of Ion Sources was bright colored and of course has pictures on the website. As we know that book The Physics and Technology of Ion Sources has many kinds or variety. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore not at all of book are generally make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading in which.
